What is this product?

Type
This product is a share of an investment company qualifying as an undertaking for collective investment in transferable securities (UCITS).

Term
This sub-fund has no maturity date. However, the manufacturer may decide to close the sub-fund under certain circumstances.

Objectives
Offer investors equity portfolio returns across a business cycle, by investing in stocks and integrating environmental, social and governance (“ESG”) considerations, while keeping the volatility in line with the long-term average of the asset class.
The Fund promotes environmental and/or social characteristics within the meaning of Article 8 of SFDR.
The top-down approach, through macro-economic analysis, will define the geographical exposure, the allocation between mega/large capitalization and mid-capitalization stocks, and the sector allocation. The Fund does not focus on a particular industry or country and will look at opportunities across all sectors of the economy. However, to achieve its general objective, the Management Company will integrate ESG considerations by applying a top-down filter to exclude companies or issuers on the basis of the industry in which they participate, including (but not limited to) the manufacture of landmines, cluster munitions, adult entertainment or tobacco products.
The bottom-up approach, through both quantitative and fundamental analysis, will define the Fund’s exposure towards particular stocks and/or industries.

Intended Investors
This Share Class is destined to Institutional investor, interested in a net positive performance, which can bear to set aside capital for at least 3 years and whose willing and able to accept meaningful losses on a temporary basis. The intended investor must have experience with the risks and rewards of investing in stocks

The currency of the share class is expressed in EUR.

What are the risks and what could I get in return ?

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you.

Be aware of currency risk. You may receive payments in a currency that differs from your reference currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

The Sub-Fund is also exposed to the following materially relevant risks that are not included in the summary risk indicator:

- Counter party risk

What happens if KYRON ESG Global Equities is unable to pay out?

If we are not able to pay you out what we owe you, you are not covered by any national compensation or guarantee scheme. To protect you, the assets are held with a separate company, the depository CACEIS Bank, Luxembourg Branch. Should we default, the investments are liquidated, and the proceeds are distributed to the investors. In the worst case, however, you could lose your entire investment.
