The prospectus and the periodic reports are prepared for the entire fund and are available in English.  
The Fund was launched in 2022 and this share class in 2022  
The currency of the share class is expressed in USD

### What are the risks and what could I get in return ?

The risk indicator assumes you keep the product for 3 Years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you.

**Be aware of currency risk.** You may receive payments in a currency that differs from your reference currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

The Sub-Fund is also exposed to the following materially relevant risks that are not included in the summary risk indicator:

- Credit risk
- Interest Rate risk
- Risk of investing in UCITS

### What happens if Low Volatility Fund is unable to pay out?

If we are not able to pay you out what we owe you, you are not covered by any national compensation or guarantee scheme. To protect you, the assets are held with a separate company, the depositary CACEIS Bank, Luxembourg Branch. Should we default, the investments are liquidated, and the proceeds are distributed to the investors. In the worst case, however, you could lose your entire investment.

Investment \$ 1000				
Scenarios		1 year	2 years	3 years

	Average return each year	15.22%	8.64%	6.09%

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, favourable and stressed scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

This type of scenario occurred for an investment between 2022 and 2023, by referring to a reference class between 2022 and 2023. The stress scenario shows what you might get back in extreme market circumstances.

## What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

- We have assumed:
- You would get back the amount that you invested (annual return) on all shown periods
  - USD 1000 is invested

Investment \$ 1000	1 year cash in	2 years cash in	3 year cash in
One-Off costs	\$ 10.00	\$ 10.00	\$ 10.00
+ Recurring Costs	\$ 31.10	\$ 63.60	\$ 97.15
