### What is this product?

#### Type

This product is a share of an investment company qualifying as an undertaking for collective investments in transferable securities (UCITS).

#### Term

This sub-fund has no maturity date. However, the manufacturer may decide to close the sub-fund under certain circumstances.

#### Objectives

The objective of the Compartment is to generate attractive risk-adjusted absolute returns by investing primarily in equity and equity-related instruments issued by companies selected according to the "Investment Strategy" (as defined below). The selection aims at encouraging companies that improve the sustainability impact via "long" investments, as well as discouraging companies that worsen the sustainability impact via "short" investments. Sustainability is determined taking in account the following environmental objectives, as foreseen by article 9 of Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on the establishment of a framework to facilitate sustainable investment (the "EU Taxonomy Regulation"):

- (a) climate change mitigation; (b) climate change adaptation; (c) the sustainable use and protection of water and marine resources; (d) the transition to a circular economy; (e) pollution prevention and control; (f) the protection and restoration of biodiversity and ecosystems.

To achieve the objective of sustainable investment, the companies selected as candidates for the "long" investments will qualify as environmentally sustainable.

#### Intended Investors

This Share Class is intended for prudent investors intending above all to preserve the invested capital while taking part in the opportunities for growth of the financial markets.

#### Other information

*Depository bank:* CACEIS Bank, Luxembourg branch.

*Class type:* this class is a capitalization class meaning that income is reinvested.

*Conversion right:* the investor has the right to convert his investment in shares in one sub-fund for shares in the same sub-fund or in another sub-fund. The investor can obtain information about how to convert in the prospectus of the fund.

*Segregation:* The assets and liabilities of a sub-fund are segregated pursuant to the law so that the commitments and liabilities of one sub-fund do not affect the other sub-funds.

*Additional Information:* Additional information about the fund, copies of its prospectus, the latest annual and semi-annual report and the latest prices of shares may be obtained free of charge from the management company or on [www.aism.lu](http://www.aism.lu). The prospectus and the periodic reports are prepared for the entire fund and are available in English. The reference currency of this share class is USD.

### What are the risks and what could I get in return?

The risk indicator assumes you keep the product for 3 years.

The actual risk can vary significantly if you cash in at an early stage and you may get back less. The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a Medium risk class.

Be aware of currency risk. You may receive payments in a currency that differs from your reference currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

The Sub-Fund is also exposed to the following materially relevant risks that are not included in the summary risk indicator:

- Counterparty risk

### What happens if KYRON Sustainable Long-Short European Equity Fund is unable to pay out?

If we are not able to pay you out what we owe you, you are not covered by any national compensation or guarantee scheme. To protect you, the assets are held with a separate company, the depository CACEIS Bank, Luxembourg Branch. Should we default, the investments are liquidated, and the proceeds are distributed to the investors. In the worst case, however, you could lose your entire investment.

Scenarios - Investment of USD 50'000		1 year	2 years	3 years

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, favourable and stressed scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

This type of scenario occurred for an investment between 2014 and 2024, by referring to a reference class between 2014 and 2024. The stress scenario shows what you might get back in extreme market circumstances.

## What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- The incidental costs are calculated based on the moderate scenario.
- USD 50'000 is invested

Investment of USD 50'000	1 year cash-in	2 years cash-in	3 years cash-in
One-off costs	USD 0.00	USD 0.00	USD 0.00
+ Recurring costs	USD 800	USD 1618.1	USD 2456.8
+ Incidental costs	USD 0	USD 33.6	USD 56.6
= Total costs	USD 800	USD 1651.7	USD 2513.4
<b>RIY</b>	<b>1.61%</b>	<b>1.64%</b>	<b>1.66%</b>

This table shows the impact of different types of costs have on what you get back at the recommended holding period and what the different cost categories mean.

One-off costs	Entry costs	3.00%	Impact if entry costs taken from when you enter the investment (this is the maximum, you could pay less)
	Exit costs	3.00%	Impact if entry costs taken from when you exit the investment (this is the maximum, you could pay less)
Recurring costs	Portfolio transaction costs per year	0.03%	Impact if the recurring costs taken from you investment each tear. The figures shown are based on our costs for last year. The figures shown cover all recurring costs, including annual management cost, operating expenses and portfolio transaction costs.
	Other recurring costs per year	1.60%	
Incidental costs	Performance fees	10.00%	Payable annually and calculated over the Performance Period on out-performance over Benchmark with High Water Mark

### How long should I hold it and can I take money out early?

You should be prepared to stay invested for 3 years.

However, you can redeem your investment without penalty at any time during this time, or hold the investment longer. Redemptions are possible on each full bank business day in Luxembourg. In exceptional circumstances, your right to request the redemption of your investment may be limited or suspended.

Recommended holding period: 3 years
