INVESTMENT OBJECTIVE

The objective of the Fund is to generate attractive risk-adjusted absolute returns by investing primarily in a selection of equity and equity-related instruments.

The selection aims at encouraging companies that improve the sustainability impact via "long" investments, as well as discouraging companies that worsen the sustainability impact via "short" investments.

The Fund identifies the best opportunities in terms of current contribution and/or rate of variation for each Principal Adverse Impact indicator as well as financial perspectives. This approach offers investors a diversified exposure across all potential improvements of such indicators as well as a range ESG characteristics.

Risk Indicator (SRI)

The risk/return profile of the Sub-Fund is represented by a synthetic indicator that ranks the Sub-Fund on a scale of 1 to 7. This scale, in ascending order from left to right represents levels of risk and return from the lowest to the highest.
